PROFESSIONAL PROFILE

Fullstack Developer, Systems Engineer (USM, 8th Semester) with experience in projects and work experience creating web and mobile applications. I transform complex ideas into real digital products, combining the logic of Backend with the interactivity of the modern Frontend. Experience in CRMs, CRUD systems, scalable APIs and Integration of AI in web development. Experience in mobile programming with React Native and Flutter. Proactive, with strong problem logic solving ability.

WORK EXPERIENCE

Software Developer - Morna Tech

Contributed to software development and collaborated on CRM and administrative systems.

FEATURED PROJECTS

COVENIN In Revit

Software Extension (Plugin) | Python, PyRevit, .NET, Revit API

- Extension for Autodesk Revit 2022 that adapts schemes to Venezuelan COVENIN standards.
- Automation of metric computation reports complying with national regulations.

CriptoGuiaVE

Financial Educational Platform | React 19, TypeScript, Tailwind CSS, Netlify Functions

- Real-time consultation tool for cryptocurrencies and exchange rates for Venezuela.
- API integration (Binance P2P, CoinGecko) with an interactive educational center and quizzes.

Morna Attendance System

Dashboard + Kiosk | React, Vite, Tailwind CSS, Flutter, Supabase

- Full redesign with polished visual identity and micro-interactions for an operational dashboard.
- Flutter kiosk with camera and offline mode; backend in Supabase with Auth, RLS, and real-time.

Glik - Payment System

Multiplatform System | Flutter, React 19, Supabase, Riverpod, Edge Functions

- Vehicle payment kiosk system with a complete web admin panel.
- Multiplatform architecture combining Flutter (mobile/kiosk) with React (admin panel).

CRM Platform

Enterprise CRM | React 19, TypeScript, Supabase, Tailwind CSS, Shadcn UI

- Enterprise CRM with omnichannel communication and comprehensive customer management.
- Modern UI with reusable components and smooth animations.

TECHNICAL SKILLS AND LANGUAGES

Programming Languages: JavaScript, TypeScript, Python, SQL, Dart, HTML5, CSS3.

Frameworks: React, React Native, Node.js, Flask, Flutter, Tailwind CSS.

Tools: Git, Docker, Supabase, REST APIs, AWS.

Languages: Spanish (Native), English (B2)

COMPLEMENTARY TRAINING

Full-Stack Programming

Social Oplesk | 2025

DevOps and Advanced Backend

Social Oplesk | 2026

English Course - Level B2

Centro Venezolano Americano (CVA) | 2022 - 2025

Public Speaking Course

ALSO (Academia International Social Oratory) | 2025

HIGHER EDUCATION

Systems Engineering (8th Semester)

Universidad Santa Maria (USM) | 2021 - *Present*

Focus on software development, data structures, and technology project management.
